

Environmental Policy Statement

This Environmental Policy sets the framework for managing our environmental activities across all operational divisions.

FMG Engineering employees shall:

- comply with relevant environmental legislation
- comply with relevant FMG Engineering environmental procedures
- actively engage with new low carbon products, processes and technologies
- implement energy reduction initiatives and utilise renewable energies across all business operations
- minimise single use products, prioritise reusable technologies and support recycling initiatives
- strive to continually improve the way we manage our environmental impacts
- take measures to reduce any negative environmental impacts resulting from our operations.

Matthew Loftes
Managing Director
